

## Product description

The KPW universal plug with plastic sleeve is made of polyamide. It is used for fastening elements to most building substrates. The plug features anti-rotation fins that keep the sleeve in place while the screw is being tightened. The sleeve adapts to the type of substrate: in solid materials fastening occurs through expansion of the sleeve, and in hollow materials or plasterboard through form locking.

## Technical description

Material: Nylon PA6  
 Diameter: 8 mm  
 Length: 50 mm

## Assortiment

Code	Plug length (mm)	Packaging (pcs/box)
KPW-06035	6 x 35 mm	500
KPW-06050	6 x 50 mm	500
KPW-08050	8 x 50 mm	500
KPW-10060	10 x 60 mm	500

## Installation
