Technical description

- Plug length/diameter
- Plug material: NYLON PA6
- Available with stainless steel AISI 304/316* wire
- Wire: 2.5 mm / 1900 N tensile strength
- Installation: hammer installation

Range

Code	Description	Packaging (pcs/box)
Kreno	Koppelanker renovatie plug+anker per 100	100
Kreno BI	Blisterverpakking	100

Installation

1. Install the anchor into the brick, hammer until the anchor is flush, then place the brick against the connecting wall.
2. Drill through the eye with an 8 mm drill into the anchoring wall, then install the hammer plug.
3. The coupling anchor is fixed.
