

Product description

The TD-060 / TDP-060 is a high-quality fastener featuring a galvanized steel screw and a collar made of polyamide or polypropylene. The system is designed to securely anchor insulation materials in ETICS systems and provides efficient fastening for polystyrene and mineral wool. Thanks to the integrated sealing, thermal bridging is reduced and corrosion is prevented. This fastening system contributes to safe and durable installation, even under high wind loads.

Technical description

- Specially designed screw fastener
- Secure installation for EPS and MW insulation
- Integrated collar to minimize thermal bridging
- Compatible with timber and steel structures
- Pre-assembled steel screw

Range

Code	Diameter (mm)	Packaging
TDP060 (nylon)	60 mm	100
TDP060 (polypropylene)	60 mm	100
