

Product description

The TSW steel drive anchor consists of a drive sleeve with internal thread and a pre-installed expansion cone. The expansion section of the sleeve is divided into four parts by lengthwise cuts. The sleeves are made of carbon steel with a zinc coating. Installation in the substrate is carried out by driving the expansion cone into the sleeve to a specified depth using a special tool (OTSW – drive anchor installation tool).

Technical description

Range

Code	Dimensions (mm)	Packaging (pcs/box)
OTSW-06	8 x 25 mm	1
OTSW-08	8 x 25 mm	1
OTSW-10	12 x 40 mm	1
OTSW-12	12 x 40 mm	1
OTSW-16	20 x 65 mm	1
OTSW-20	25 x 80 mm	1
